**DETAILED ACTION**

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 6-9,11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Either Faust et al 5,934,748 or De 19703516, in view of Inoue 024'. Both DE and Faust et al teach the claimed heating and ventilation of a seat, see Abstract in DE and see column 4 in Faust et al, depicting ventilation above a set seat temperature and heating below a set seat temperature. The patent to Inoue et al is applied for teaching seat heating and ventilation, with sensing of the outdoor temperature, as claimed. Use of the same leads to more accurate seat temperature control and in view of this teaching it

would have been obvious to modify either of Faust et al or DE, with outdoor temperature sensing, as claimed, to afford more accurate temperature control of the seat.

***Allowable Subject Matter***

Claim 10 is allowed.

***Response to Arguments***

Applicant's arguments with respect to claims 6-11 have been considered but are moot in view of the new ground(s) of rejection.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Mark H. Paschall whose telephone number is 571 272-4784. The examiner can normally be reached on 7am - 3pm.
